

Course Contents

www.egrc.org.eg

Skills:

1. Basic Life Support
 2. Airway Management
 3. Vascular access
 4. Fluids/ drugs
 5. Defibrillation/ Cardioversion
 6. Integrated Summation
- Respiratory failure
 - Circulatory failure/Trauma
 - Resuscitation of Birth
 - Cardiac Arrest/Magnocoe

Fees: 1000 EGP

Topics

- Seriously ill child: Circulatory Insufficiency
- Seriously ill child: Respiratory Insufficiency
- Vascular Access/Fluids/Drugs
- Airway Management
- Defibrillation/Cardioversion/AED
- Rhythm Recognition
- Management Algorithm
- Post Resuscitation Care
- Resuscitation of Birth
- Trauma

ERC Certificate valid for 3 years
36 CME Credit Hours

European Pediatric Life Support (EPLS) Course

Overview

- The European Resuscitation Council EPLS Provider Course, based on the ERC Guidelines, is designed for health care workers who are - in out-of-hospital or in-hospital environments - involved in the resuscitation of a newly-born, an infant or a child.
- The course lasts two days and aims at providing the care workers with the knowledge and skills for ensuring adequate management of the critically ill child, during the first hours of illness.
- A manual and pre-course multiple choice question papers will be issued to the participants one month before the course. Competence in paediatric basic life support is a prerequisite.

Assessment:

1. Infant FBAO/BLS and Child BLS assessment
2. Clinical Scenario assessment
3. MCQ

ABC

- Assess
- Treat
- Reassess
